Iris Gardens

Hutchinson, Kans.

A. H. Bangard

Greetings 1954

As each spring arrives we are constantly reminded of how fortunate we are in having the capacity to appreciate beauty. It is the third dimension of living to be able to see something besides wood in a tree, or leaves in a plant. Iris lovers are often sustained in life by the thrill that comes from their beautiful gardens. Through this love of beauty we feel a tie of friendship with all our customers.

We have added many of the newer varieties to our list this year, and we almost regret that many of the older kinds must make way for them. We are located just a mile south of Hutchinson on Highway 17. Our blooming season reaches its peak about May 15, and we believe you will find our iris (2 acres) and peony (4 acres) gardens worth including in a tour of Kansas gardens. Our soil grows good roots and we insist that our customers are satisfied or we make adjustments.

Happy gardening to you! We offer this list as one garden lover to another, knowing that you will find, as we have, the peace and relaxation that comes from adding new beauty to your garden and home.

ACREDITED JUDGE OF AMERICAN IRIS SOCIETY

CULTURE

It is a mistake to assume that because iris are extremely hardy that they will not respond to a careful cultural plan. Above all, iris must have full sun and good drainage—given such conditions many of your iris troubles will be averted. Keep all dead leaves and litter removed—these breed disease. Iris will thrive in any ordinary garden soil. A good plan for the fertilizing of iris is to apply gypsum or lime in the spring, superphosphate after blooming, and a feeding of bone-meal in the fall. Larger blooms and more vigorous plants will be your reward.

GUARANTEE

All our stock is state inspected and we guarantee to supply clean, healthy roots, true to name. Adjustment will be made wherever any dissatisfaction occurs.
